AUTOMOTIVE/AIRCRAFT/MARINE PAINT REMOVER

"CMA has been on the forefront of the paint remover market since 1982.

Our paint removers are not retail store type products, they are maximum strength removers for the professional refinisher."

CMA Strip-It-Dry Automotive Paint & Coatings Remover

The original dry automotive paint stripper that revolutionized the industry over 30 years ago! This unique patented product is a wet-to-dry paint remover that lets the stripper do the work for you! In the refinishing industry, time is money, so why waste time and money with physically sanding? Brush on wet, walk away, allow to dry thoroughly then remove. The dried paint crust makes clean up and disposal easy. If you are going to use a paint remover, then why not use the most effective and user friendly remover on the market. Excellent for restoration use as well as powder coat coatings removal!

CMA Spray-N-Strip is designed to spray on for easy application, especially in hard to reach areas. Finish can be removed wet or dry. Extra strength, non-flammable formula. Excellent for today's plastic bumper top-coat removal and refinishing, as well as metal & aluminum wheel refinishing. Includes 1 plastic trigger spray bottle.

Aircraft Paint & Coatings Remover Formulated for efficient removal of aircraft and automotive finishes. This products conforms to all aircraft specifications for hydrogen embrittlement and has been certified by Boeing and MacDonal Douglas. Excellent choice for aircraft refinishing or restoration.

Fiberglass Paint & Coating Remover Formulated especially for the removal of paint & coatings from fiberglass surfaces of cars, trucks, aircraft and boats. This product when used as directed will not damage the original gel coat. Excellent for Corvette or boat restoration!

MUSCLECLEARs: HIGH PERFORMANCE WITH AN ECONOMICAL EDGE!

Why choose CMA's line of clearcoats over the competition? Simply because our three clear line does the work of other brand's complicated, multiple clear lines. Using only the best quality materials and our quality-controlled, handmade manufacturing process ensures a level of consistency that rivals the top clears on the market. Put CMA's clear to the test and you'll find out why we call this line "MuscleClears"..... they offer the best bang for your buck!

MuscleClears HS 2.1 VOC Overall/Multi-Panel Urethane Clearcoat **MuscleClears HS 2.1 VOC Spot/Panel Repair Urethane Clearcoat**

CMA's OUC2000 and SPC4900 are premium quality urethane clearcoats utilizing state of the art resin technology, which offers exceptional gloss, a durable finish, and excellent clarity producing better color matching. These clearcoats are "California-style" ultra high solid products that exceed Federal V.O.C. standards when mixed properly. They can be baked or air-dried and offer the flexibility of three hardeners for changing shop conditions.

Features:

- Economical but ultra high solid, high quality clearcoats
- Excellent flow and leveling. Multiple UV inhibitors
- Easy buffing; Thoroughly tested for long term durability
- Compatible with all basecoat & waterborne system
- Ultra-Low 2.1 lbs./hl V.O.C.

MuscleClears Hi-Production MS 2.6 VOC Overall/Multi-Panel Urethane Clearcoat **MuscleClears Hi-Production MS 2.8 VOC Spot/Panel Repair Urethane Clearcoat**

CMA's HPC2000 and HPC4900 are economical yet premium quality urethane clearcoats utilizing state of the art resin technology, which offers exceptional gloss., a durable finish and excellent clarity, producing better color matching. These clearcoats are medium solid products that meet or exceed National Rule V.O.C. standards when mixed properly. They can be baked or air-dried and offer the flexibility of three hardeners for changing shop conditions.

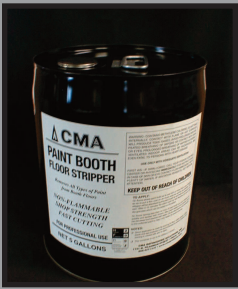

Features

- Excellent workhorse clearcoat for the high production shop
- Excellent flow and leveling. Multiple UV inhibitors
- Easy buffing; Thoroughly tested for long term durability
- HPC4900 offers faster dry times; Easy buffing withing 3-5 hours
- Ready to spray, no reduction necessary
- Economical yet a medium solids, high quality clearcoat

- Compatible with all basecoat & waterborne systems

PAINT BOOTH CARE PRODUCTS/PROTECTANTS

CMA Paint Booth Floor Stripper A CMA patented exclusive! Paint Booth Floor Stripper is a unique and revolutionary product that is used to cut fast through all types of paint build-up on commercial paint booth floors. This non-flammable solvent make spray booth floor cleaning quick and safe. Excellent for use on the additional buildup associated with current waterborne paint systems.

Great-Kleen is a user friendly, specially formulated blend of solvents designed to clean metal paint booth grates from everyday overspray build-up, restoring your downdraft paint booth's efficiency. No scraping necessary!

Booth-Shield is a water washable, non-toxic, biodegradable paint booth coating that, when properly applied, will prevent everyday paint overspray from adhering to paint booth walls. Booth-Shield not only can be used on walls, but also on paint booth covered lights in which it's clear tacky formula doesn't hinder lighting. Booth-Shield is designed to easily wash off paint booth walls with a water hose or pressure washer. It does not require peeling, which is time consuming.

Stack-Kleen is another CMA first, a revolutionary cleaner formulated to make removal of paint residue buildup inside commercial spray booth exhaust stacks easy. This new fast-acting formula makes a usually time consuming, labor intensive job easier and safer. No scraping necessary!

Liquid-Mask is a unique spray-on coating that provides complete overspray protection on vehicle surfaces in minutes. This revolutionary product can protect the entire vehicle including underbody, grills, headlights, wheels and wheel wells. The coating will leave a tacky surface so that the dust, dirt, and overspray cannot adhere to the vehicle surface. This unique formulation makes clean up easy since it contains a mild detergent that can be easily washed off with water.

REDLINE REDUCERS

CMA's Redline Reducers cover the refinishing spectrum by offering compatible, direct-replacement reducers for most acrylic, alkyd, urethane and waterborne paint systems on the market today. Zero VOC and low VOC reducers are also available.

INDUSTRIAL PRODUCTS

CMA Industrial Paint & Coatings Remover CMA 520A is an industrial strength paint & coatings remover used to remove all types of finishes from metals, ceramics and masonry. **Makes an excellent graffiti remover!**

Label-Off is an industrial strength drum reconditioning & label remover used to remove all types of labels, paints, and coatings from drums/barrels/containers during the reconditioning process. Just brush on and let the product work, no scraping!

- Industrial strength, ready to use
- Non-flammable
- Non-photo chemically reactive
- Biodegradable
- Contains no Phenols

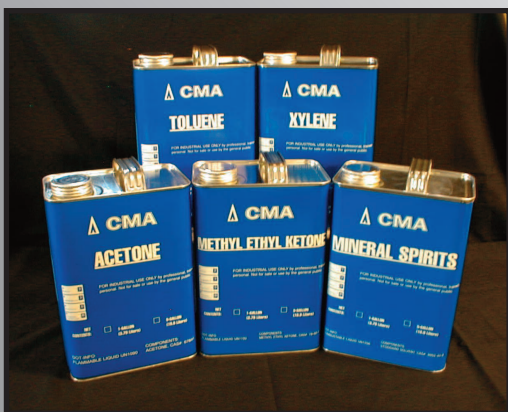

CMA Wood/Furniture Paint & Coatings Remover CMA Wood/Furniture & Coatings Remover is a paste remover for large and special applications designed to remove any paint of varnish off existing wood, metal or masonry. This product leaves the wood looking like new and will not raise the wood grain. Excellent for the restorer or the home do-it-yourself jobs. Professional strength, ready to use. Use water or solvents to wash off. Also available in thinner "dip-tank" or "Flo-Over" formulations for the larger refinisher.

CMA's Prep-Kleen #90 & Final Wash #220 Metal & Paint Finish Surface Cleaners

Prep-Kleen #90 and the fast drying Final Wash #220 are formulated with a combination of organic solvents designed to give the highest possible dissolving power of silicone, wax, grease, tar, and road oils. Both products produce a slight softening action on paint films, which imparts better bonding and adhesion of succeeding coats.

CMA's Blueline Industrial Solvents and Cleaners

CMA offers a complete line of virgin-grade industrial and cleaning solvents, as well as specialized and custom blended products for the Industrial and Automotive markets. Products include:

- Acetone
- Adhesive Remover
- Denatured Ethyl Alcohol
- Engine Degreaser
- Metal Prep (Etching Wash)
- OTC Compliant Cleaning Solvent (Ultra Low VOC)
- Toluene
- Spray Gun Wash Booster
- Lacquer Thinner
- Mineral Spirits
- Methyl Ethyl Ketone
- Parts Washer Solvent
- VM&P Naphtha
- Xylene
